Sustainability - Our Green Values

It's never been easier to feel good about going to a faraway place. Our green initiatives underpin our mission to provide the most sustainable vacation experience possible. How do we do this?

- We draw 50 percent of the energy we use from the sun, through a photovoltaic solar array.
- We reduce our carbon footprint with a series of programmes to recycle, reduce waste, and source locally.
- We support local organisations with a mission to improve our environment and community.
- The Seychelles are home to a tropical, warm climate the whole year, with an average temperature between 26 and 32 degrees.
